**Dr. John Svirsky**

'Come In And Catch It' and 'It's More Than Physical'

Wednesday, January 15, 2020

**Course #1 Objective:**

Perfect review course that covers the recognition, diagnosis and treatment of the 25 soft tissue lesions that every dentist and hygienist should know and treat appropriately. Numerous entities only require recognition. Classic lesions that have been forgotten since school will be brought back to life and your diagnostic confidence will be re-energized. Dr. Svirsky makes oral pathology fun!

- Demonstrate logical approach to diagnosis of oral lesions
- Recognize & diagnose common soft tissue lesions/diseases found in a dental practice.
- Integrate therapeutic regimens used to treat selected oral diseases such as aphthous ulcerations, herpes, candidiasis, angular cheilitis & lichen planus.

**Course #2 Objective:**

New course for 2020 will be a review of physical and chemical injuries. Course will include electrical and other burns, traumatic injuries, osteonecrosis, oral sexual practices, chemotherapy complications, cosmetic fillers and much more. Just to keep your interest, chewers, pickers, pokers and "midnight tokers" (Steve Miller Band) will make appearances. Get ready to have a wild oral pathology ride. This course is rated PG13.

- Recognize & treat lesions related to physical & chemical injuries
- Logical approach to diagnosis & treatment of burns/traumatic injuries
- Develop a logical approach to management of chemotherapy complications
- Develop a logical approach to management of radiation complications
- Recognize oral sexual injuries
- Recognize traumatic injuries from both heat & cold
- Diagnose & treat osteonecrosis
- Recognize lesions found in pickers & chewers
- See some unusual cases that even embarrass me (that may be an exaggeration)

**Dr. John Svirsky** is a board certified oral and maxillofacial pathologist at Virginia Commonwealth University in Richmond, Virginia. He is a sought after speaker with an international reputation as an informative and entertaining lecturer.

All programs are suitable for doctors, staff, and hygien-

2

**Dr. Brian Nový**

'Offensive Dentistry'

Thursday, April 2, 2020

**Course Objective:**

Let's face it, sitting through a lecture about dental caries or caries risk assessment isn't appealing (in fact it sounds downright boring). However, the science of clinical cariology is beginning to have an impact on restorative techniques and technology. Streptococcus mutans has more to fear than a rheostat, now that we're armed with salivary diagnostics and bioactive materials.

**At the end of this course, participants should be able to:**

- Understand how to intervene medically in the caries process.
- Control patient caries risk with focused therapeutics.
- Design restorations to minimize recurrent decay.
- Improve the prognosis of restorative treatment.

**Dr. Nový** is the President of the DentaQuest Oral Health Center, Director of Practice Improvement at the DentaQuest Institute, and an adjunct associate professor of general dentistry. He served on the ADA Council of Scientific Affairs 2010-2014, and as chairman of the CAMBRA coalition through 2015. The California Dental Association Foundation presented him with the Dugoni Award for "Outstanding contributions to dental education," and in 2009, the American Dental Association awarded Dr. Nový and his office the title, "Adult Preventive Care Practice of the Year." In 2016 he was appointed the consumer advocate on the United States Food and Drug Administration Dental Products Panel.

This program is sponsored by GC America.

**Dr. Robert Lowe**

'The Aesthetics of Occlusion: Back To The Future!'

Thursday, September 10, 2020

**Course Objective:**

According to Dr. Harold M. Shavell, who many consider "The Michelangelo of Dentistry", Occlusion is the Common Denominator of All Dentistry." Every restoration placed has the potential to profoundly alter the occlusal and/or the incisal relationships of the patients' dentition. Thus, understanding, visualizing, and reproducing human dentate morphology, regardless of the material used...is the key to long lasting dental restoration. Reviewing fundamentals of direct restorative, crown and bridge will help all dentists improve the quality and art of the dentistry they provide. This lecture will take everyone "back to the future" to discover that the importance of sound technique and morphologic precision is just as important in today's dental practice as it was when Dr. Shavell practiced his craft.

**Learning Objective:**

- "It All Started With Alloy" - Biomorphaesthetics: The Quickest Way to Understand Occlusion...Guaranteed!
- "If You Can Draw It, Carve It" - Using The Principals of Biomorphaesthetics With Anterior and Posterior Composites
- Morphology and Occlusion—"Back To The Basics" - The Importance of Linguovision
- ABC Contacts—The Pokorny Construct—What Do Those Dots Mean?
- Occlusal Adjustment: Spheroiding or Biomorphaesthetic Reshaping...NOT Grinding
- The Art and Science of Provisionalization

Dr. Robert Lowe is an internationally known lecturer. His programs focus on today's latest dental materials.

Dr. Robert A. Lowe received his DDS degree, magna cum laude, Loyola University in 1982, has maintained a full time practice for 30 years, and is a world recognized teacher and clinician. He taught for 10 years at Loyola University School of Dentistry and has received Fellowships in the AGD, ICD, ADI, and ACD. In 2004, Dr. Lowe received the Gordon Christensen Outstanding Lecturer Award and in 2005 received Diplomate status on the American Board of Aesthetic Dentistry.

This program is sponsored by Catapult.

**Dr. Chad Duplantis**

'Millennial Dentistry: Elevating Your Restorative Game'

Thursday November 5, 2020

**Course Objective:**

Technology is here to stay, and the clinical team must be on board to accept the new reality or be left behind. This course is designed to help the office run more efficiently, communicate better, and produce quality dentistry consistently. We will discuss various technological advancements and their impact on dentistry. Included in our discussions will be scanners, mills, advancements in indirect materials, and digital implant workflows. At the end of the day, many myths will be debunked and the team should leave with a new outlook on practicing quality dentistry. Although this course has a digital undertone to it, the whole team can benefit from the presentation.

**Learning Objectives:**

- What is with all of the changes, and who's benefiting the most?
- Discuss the digital tools that your office needs for success, including scanners, mills, and 3D printers.
- Learn in-depth the digital workflow for both the dental team and the laboratory and why it leads to predictable outcomes.
- Discuss many of the new indirect materials and when and how to use them, both chairside and laboratory fabricated.
- Learn the benefits of an accurate digital smile design and ability to transform a 2D rendering into a fabulous smile.
- Visualize the restorative driven digital implant workflow, including diagnosis, collaborative treatment planning, and final restorative outcome.
- Discuss successes and how to avoid failures utilizing new technology.

Dr. Duplantis received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1999.

He then continued with Post doctorate training at Baylor College of Dentistry, earning a certificate in Advanced Education in General Dentistry in 2000. He has also received his Fellowship degree from the Academy of General Dentistry. He has been in private practice since 2000 in the North Fort Worth, Texas area. In private practice, he treats all ages with an emphasis on restorative and aesthetic dentistry.

This program is sponsored by Catapult.

*Excellence has become our tradition ...*

Dear Colleagues in Dentistry:

Corydon Palmer Dental Society's Continuing Education Committee is proud to announce the presenters for our 2020 CE season. Each of our four programs features outstanding speakers sharing the kind of experience and knowledge that will benefit our members, staff, and ADA colleagues.

Our long tradition of CE programming features presenters who have enhanced our reputation as a provider of quality CE programs. Our programs will cover topics of contemporary concern: **Come in and Catch It, It's More Than Physical, Offensive Dentistry, The Aesthetics of Occlusion, Millennial Dentistry: Elevating Your Restorative Game.** We can all benefit from the richness of knowledge in these programs.

Your support has enabled us to offer our CE workshops at bargain prices. Corydon Palmer members *and other ADA members* can purchase the entire series for only \$775 if paid by January 1. After that the cost will be \$825. Nonmembers may purchase the series for \$925. It's easy to see the benefits of series membership, as the cost for each of the four courses on an individual basis will be \$290 for CPDS and ADA members, \$340 for nonmembers. Staff, spouses, \$65 and residents/retired members who receive no income from dentistry are invited to attend for \$45 per course.

Those who attend the full series will earn more than the required hours of CE training for the year. Please note: speakers and/or topics may change for reasons beyond our control.

**Please note that this year's courses will ALL be held at the Holiday Inn Boardman; directions are on the back of this brochure.** We urge you to join us for some of the finest CE courses in the state and beyond!

Best regards,

The Continuing Education Committee

Corydon Palmer  Dental Society  
since 1913
