Dr. Michael Morgan 'Direct Composites'

Wednesday, January 11, 2023

There have been significant improvements in composite and adhesion technologies. Composites are often perceived as being so complicated/time consuming that many clinicians are apprehensive to incorporate them into practice. However, new technologies actually enable clinicians to place the majority of their direct composites in a highly predictable, repeatable and efficient manner with a

simplified bonding and composite technique.

This course will provide you with an arsenal of practical approaches to simplify direct resin placement while increasing the options available to you. Simplified placement translates into lower cost to the doctor to provide treatment and more efficiency in delivery time.

Development of metal-free alternatives for the restoration of posterior teeth has been driven by patient demand for improved esthetics. Advances in adhesive and resin technology are rapidly positioning composites as functional preferences in posterior treatment. New techniques and materials can allow clinicians to place posterior resin restorations faster, easier, more predictably and in a time comparable to amalgam restorations.

- Simplified shade mapping system to efficiently choose the value, shade and surface characteristics of any resin restoration.
- How to immediately dentin seal and resin coat dentin prior to composite placement.
- Techniques to simplify layering and achieve natural polychromicity in two shades or less.
- Three methods to determine the lingual contour and incisal position of Class IV composites.
- Proper preparations for Class-IV restorations.
- How to efficiently and predictably restore multiple Class II posterior composites.
- Master fast/ beautiful finishing/polishing
- Understand multiple uses for flowable composites.

Dr. Michael Morgan, has over 25 years of teaching and 37 years of practice. Dr. Morgan embraced the challenging field of direct composite restorations and aesthetic dentistry. He began developing the comprehensive, cutting-edge philosophy that guides his work today.

**Course Sponsored by: Kuraray Noritake Dental*

LOCATION FOR 2023 WILL BE THE HOLIDAY INN BOARDMAN

Dr. Kari Cunningham

'Pediatric Dentistry for the General Practitioner'

& 'Excellence in Diversity & Inclusion from Patient Care to Team Leadership'

Thursday, March 30, 2023

Basic Principles in Pediatric Dentistry for the General Practitioner

From preventive, restorative and surgical procedures, to behavior guidance techniques and minimally invasive options for the pre-cooperative child, clinicians will learn basic principles in pediatric dentistry to assist in diagnosis and treatment planning.

- Define pediatric dentistry, early childhood caries, severe early childhood caries, and dental neglect.
- Components of an infant dental visit and identify aspects of preventive pediatric dentistry.
- Basic and advanced behavior guidance techniques.
- Describe the types of restorations and armamentaria needed for the treatment of primary teeth.
- Purpose and indications for pulp treatment in the primary and immature/mixed dentition.
- List indications for extractions and the armamentaria needed for pediatric dental surgical procedures
- Describe the purpose of space maintenance therapy
- Understand minimally invasive dental options for pre-cooperative children such as SDF, Hall Crown, and Atraumatic Restorative Techniques

Excellence in Diversity and Inclusion from Patient Care to Team Leadership

Discuss diversity and inclusive excellence as an oral health care practitioner. Discussions around bias, stereotypes, and social justice will take place. We will review how the clinician can be more inclusive of populations based on age, gender, race/ethnicity, socioeconomic status and how an online presence can assist potential patients in their search for a diverse and/or inclusive dental office. We will define temperaments and how the diversity of our temperaments can facilitate leadership in the dental office and lead to effective communication among team members and patients.

Dr. Kari A. Cunningham is a Board-Certified Pediatric Dentist, Fellow of the American Academy of Pediatric Dentistry, and owner of Panther Pediatric Dentistry. She contributes to the profession as a leader, faculty member, and volunteer. She is currently serving as the President of the Case Western Reserve University School of Dental Medicine Alumni Association Board of Directors and is a Past President of the Greater Cleveland Dental Society. She also serves as an Assistant Clinical Professor in the Department of Pediatric Dentistry at CWRU where she provides lecture courses to the dental students, EFDA students, and pediatric dental residents.

Dr. Nadar Sharifi

'Uppers are from Mars, Lowerers from Venus: Clarifying Overdentures'

Wednesday, May 17, 2023

Dentists can choose from four available options when treatment planning for a completely edentulous arch; denture, implant retained overdenture, implant supported overdenture and a fixed bridge. Complete dentures and implant retained fixed bridges are well understood, but the two intermediate overdenture options are confusing. I'll clarify the difference between the implant retained overdenture and the implant supported overdenture.

Indications for each option will be created for both the upper and lower arches.

Clarification of the overdenture answers one question, but poses another - how does attachment selection impact overdenture fabrication? Three attachment families to choose from in addition to rotational bars and non-rotational bars. All of these attachments have indications and contra-indications. Simplification for overdenture therapy.

Clinical pick up of an attachment under an overdenture is a challenging task full of potential errors. Review three excellent techniques and share clear guidelines when one should be selected over another. I'll introduce the Atlas of Overdenture Design that I've created and share those solutions for future reference and comfort with this treatment for all our patients.

Leave with increased confidence and a clear understanding of clinical treatment ideals, including the ability to:

- List the four restorative solution for treating an upper or lower edentulous arch
- Clarify the difference between implant retained & implant supported overdentures.
- Identify which three options dominate in the upper arch and the different three that dominate in the lower arch.
- Understand how implant location dictates attachment selection.
- Master the difference between resilient and non-resilient attachments.
- Review clinical protocols for intra-oral attachment pick up
- Getting the occlusion right – easy delivery solutions
- Review different impression protocols and understand when each is indicated

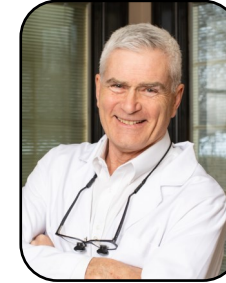

This all-day course is geared toward general practitioners, prosthodontists, surgical dentists and lab technicians.

M. Nader Sharifi, D.D.S., M.S. holds a certificate in prosthodontics and a masters degree in biomaterials from Northwestern University. He received his dental education at the University of Illinois. He has presented more than 500 lectures covering numerous topics on restorative dentistry earning him recognition from esteemed study groups, societies and associations across the nation and internationally. He also maintains a full-time private practice of prosthodontics in Chicago's downtown loop.

Dr. Mark Murphy 'Sleep Apnea'

Wednesday, November 8, 2023

Treating Sleep Apnea in Your Practice; From Getting Started to Medical Billing

This course will allow the general practitioner to survey the current landscape of medical and dental treatments for sleep apnea and decide how and if they want to evolve into this life saving arena. The overview will

cover marketing, physician communication, basic treatment philosophies, appliance choices, medical billing and the financial and emotional impact on your practice and team. Sleep medicine has progressed in both the diagnosis and treatment protocol and outcome predictability. We will have a limited hands on/demonstration aspect in the afternoon to evaluate and compare different devices, sleep tests, impression and bite registration techniques. This course is an overview to help you determine if you want to treat these patients and not a substitute for full training in sleep dentistry.

Learning Objectives:

- General understanding of the sleep related conditions and the role of the dental team.
- Develop a matrix for screening, testing, and treating your current patients.
- Overview of the medical billing process and the financial and emotional impact on your practice.

Mark T. Murphy, DDS, D ABDSM, FAGD practices part time in Rochester Michigan, is the Lead Faculty for Clinical Education at ProSomnus Sleep Technologies, chairs the Dental Sleep Medicine program at the Detroit Mercy School of Dentistry and as a Regular Presenter on Sleep and TMD at the Pankey Institute.

He has served on the Boards of Directors of the Pankey Institute, National Association of Dental Laboratories, the Identallloy Council, the Foundation for Dental Laboratory Technology, St. Vincent De-Paul's Dental Center, and the Dental Advisor.

He lectures internationally on Leadership, Practice Management, Communication, Case Acceptance, Planning, Occlusion, Sleep and TMD. He has a knack for presenting pertinent information in an entertaining manner.

Excellence has become our tradition ...

Dear Colleagues in Dentistry:

Corydon Palmer Dental Society's Continuing Education Committee is proud to announce the presenters for our 2023 CE season. Each of our four programs features outstanding speakers sharing the kind of experience and knowledge that will benefit our members, staff, and ADA colleagues.

Our long tradition of CE programming features presenters who have enhanced our reputation as a provider of quality CE programs. Our programs will cover topics of contemporary concern: 'Direct Composites', 'Pediatric Dentistry for the GP' & 'Excellence in Diversity & Inclusion from Patient Care to Team Leadership', 'Uppers are from Mars, Lowerers from Venus: Clarifying Overdentures' and 'Sleep Apnea'. We can all benefit from the richness of knowledge in these programs.

Your support has enabled us to offer our CE workshops at bargain prices. Corydon Palmer members and other ADA members can purchase the entire series for only \$795 if paid by January 1. After that the cost will be \$825. Nonmembers may purchase the series for \$925. It's easy to see the benefits of series membership, as the cost for each of the four courses on an individual basis will be \$290 for CPDS and ADA members, \$340 for nonmembers. Staff and spouses are \$65 and residents/retired members who receive no income from dentistry are invited to attend for \$45 per course.

Those who attend the full series will earn more than the required hours of CE training for the year. Please note: speakers and/or topics may change for reasons beyond our control.

Please note that this year's courses will ALL be held at the Holiday Inn Boardman; directions are on the back of this brochure. We urge you to join us for some of the finest CE courses in the state and beyond!

Best regards,

The Continuing Education Committee

Corydon Palmer  Dental Society

Registration Information

All meetings will take place at **Holiday Inn Boardman, 7410 South Ave Youngstown, Ohio 44512** from 8:30 a.m. to 4:00 p.m. Registration begins at 8 a.m.; lunch is included in the seminar fee. For more information, email Corydon Palmer Dental Society at director@corydonpalmer.org.

How to reach Holiday Inn Boardman from:

Pittsburgh and points East: Pa. Turnpike to Ohio Turnpike Exit 1; I-680 North to U.S. 224 (to Canfield); West to second light, at South Avenue; turn left. Holiday Inn Boardman is ¼ mile on the right.

Cleveland and points West: Ohio Turnpike East to Exit 218 toward Youngstown. Merge onto I-680 South via Exit 224B toward Youngstown. Take the US 224 West exit, Exit 11A, toward Canfield. Turn slightly right onto Boardman-Poland Road (US 224). Turn left onto South Avenue. Holiday Inn Boardman is ¼ mile on the right.

Ashtabula and points North: Route 11 south toward Youngstown, merge onto OH-711 South to I-680 south. Take I-680 to US 224 West exit, EXIT 11A, toward Canfield. Turn slight right onto Boardman- Poland Road (US 224). Turn left onto South Avenue. Holiday Inn Boardman is ¼ mile on the right.

Columbus and points South: Route I-71 to I-76 East. Take I-80 east toward Youngstown/New York City. Merge onto I-680 south via EXIT 224B toward Youngstown. Take US 224 West, EXIT 11A, toward Canfield. Turn slightly onto Boardman-Canfield Road, US 224. Turn left onto South Avenue. Holiday Inn Boardman is ¼ mile on the right.

Holiday Inn Boardman's Phone No.: 330-726-1611

Continuing Education Credit: Corydon Palmer Dental Society is an approved sponsor of the Ohio State Dental Board and the board will accept 6 hours toward the continuing education requirements for all courses. These courses are also accepted by the Academy of General Dentistry for continuing education credit.

Please note: Corydon Palmer Dental Society works hard to identify and select top-quality speakers. We sincerely hope all courses will be interesting and enjoyable for all. However, please understand that CPDS cannot be held responsible for content and cannot issue refunds to participants who are disappointed with a course or speaker.
