**Course Objective: 'Phantom Of The Opera-tory- Essential Pharmacology For The Whole Dental Team'**

The challenge faced by all clinicians today is to provide safe and effective dental treatment to their medically complex patients. It is imperative that all dental practitioners be equally aware of the medical considerations of agents commonly used in the practice of dentistry as well as the dental considerations of the medications frequently prescribed for the treatment of multiple systemic diseases. This program will present an overview of dental pharmacology for the whole dental team. Special emphasis will be given to those medications prescribed or administered in the practice of dentistry whose actions, effects, or interactions with other drugs may impact treatment of systemic disease.

**Learning Objectives:**

- Pharmacology of opioid & non-opioid analgesics.
- Appropriate prescribing practices for opioid & non-opioid analgesics in the management of acute dental pain.
- Local anesthetic agents with respect to their mechanism of action, adverse effects & contraindications.
- Pharmacology of anti-infective agents commonly used in dentistry and their clinical considerations.

**Course Objective: 'Take It On The Run Baby! - Street Drugs & Other Substances'**

Its a fast-paced world and many patients may seek the assistance of substances to cope and get through their busy, trying days. The use and abuse of both licit and illicit substances has the potential to produce adverse

reactions and life-threatening medical emergencies during dental treatment. This comprehensive program will explore strategies for identifying the dental patient using and abusing substances, as well as techniques for effective patient management and treatment. Special emphasis will be given to a discussion of patients using cannabis for both medical and recreational purposes.

**Learning Objectives:**

- Impact of substance dependence and abuse on dental therapy & on overall patient health.
- Explore the world of the most commonly used street drugs with regard to:
  - Street names, common adverse effects
  - Oral manifestations
  - Dental treatment considerations
- Describe techniques useful in identifying and successfully **managing patient substance use and dependency.**

**Dr. Thomas Viola**, has over 30 years' experience as a pharmacist, educator, speaker and author. Dr. Viola, R.Ph., C.C.P. has earned his reputation as the go-to specialist for delivering quality CE content through his informative engaging presentations. Tom's sellout programs provide an overview of the most prevalent oral and systemic diseases and the most frequently prescribed drugs used in their treatment. Special emphasis is given to dental considerations and strategies for effective patient care planning.

**All programs are suitable for doctors, staff, and hygienists.**

**Registration Information**
