

Welcome to our Third CE program of 2021

Dr. Ankur Gupta
Realizing Extraordinary
Wednesday, May 19 2021

Summary:

What makes your office different? Special? Extraordinary? Most dental offices respond with the same answers. They say things like, "we are very friendly," or "we have superior clinical skills." Unfortunately, when all offices answer the same way, it means that they are normal, not extraordinary. Dr. Gupta provides specific, easy to implement tools, techniques, and steps that will make clinical dentistry

more predictable, team communication more efficient, and your patients' experience more extraordinary.

He will also share small changes you can make in your daily routine that will promote health and longevity throughout your dental career.

Objectives:

- Learn updates in dental technology that will simplify life in the operatory
- Create an extraordinary new patient experience
- Learn 10 free or low-cost service initiatives that no other dentist in your town is doing
- Create in-office philanthropy that will not only position you as a special office, but will also catapult your community reputation
- Gain strategy to permanently implement fun and exciting ideas, rather than watch them fizzle out over time
- Develop a daily routine ensuring the best possible outcome for your neck, back, and wrists

Dr. Gupta completed a one-year GPR in Cleveland and started a practice from scratch in 2005. Armed with what he considered adequate knowledge, hand skills, and a personable demeanor, he watched as his practice floundered, finances became un-predictable, and his lower back and spirit toward life became worrisome. Rather than continue the trend, he made a guinea pig out of his office, family, and self; attempting any and all personal and professional "experiments" in self-improvement. More than a decade later, he enjoys excellent new patient numbers and case acceptance, a solution oriented dental team; and most importantly, a meaningful and positive identity. He happily shares the failures and successes with dental and community and always ends his presentations with practical, implementable, step-by-step ways to *be better*.
