

Welcome to our Final CE program of 2020!

'Millennial Dentistry: Elevating Your Restorative Game'

Dr. Chad Duplantis

Thursday, November 5, 2020

Course Objective:

Technology is here to stay, and the clinical team must be on board to accept the new reality or be left behind. This course is designed to help the office run more efficiently, communicate better, and produce quality dentistry consistently. We will discuss various technological advancements and their impact on dentistry. Included in our discussions will be scanners, mills, advancements in indirect materials, and digital implant workflows. At the end of the

day, many myths will be debunked and the team should leave with a new outlook on practicing quality dentistry. Although this course has a digital undertone to it, the whole team can benefit from the presentation. This is a full day course, and could include a hands on component for an additional half day.

Learning Objectives:

- What is with all of the changes, and who's benefiting the most?
- Discuss the digital tools that your office needs for success, including scanners, mills, and 3D printers.
- Learn in-depth the digital workflow for both the dental team and the laboratory and why it leads to predictable outcomes.
- Discuss many of the new indirect materials and when and how to use them, both chairside and laboratory fabricated.
- Learn the benefits of an accurate digital smile design and ability to transform a 2D rendering into a fabulous smile.
- Visualize the restorative driven digital implant workflow, including diagnosis, collaborative treatment planning, and final restorative outcome.
- Discuss successes and how to avoid failures utilizing new technology.

Dr. Duplantis received his D.D.S. degree from The University of Texas Health Science Center at San Antonio, Dental School in 1999.

He then continued with Post doctorate training at Baylor College of Dentistry, earning a certificate in Advanced Education in General Dentistry in 2000. He has also received his Fellowship degree from the Academy of General Dentistry. He has been in private practice since 2000 in the North Fort Worth, Texas area. In private practice, he treats all ages with an emphasis on restorative and aesthetic dentistry.

This program is sponsored in part by Catapult
All programs are suitable for doctors, staff, and hygienists.
