

Welcome to our Second CE program of 2020

Dr. Brian Nový

Offensive Dentistry

Thursday, April 2, 2020

Course Objective:

Let's face it, sitting through a lecture about dental caries or caries risk assessment isn't appealing (in fact it sounds downright boring). However, the science of clinical cariology is beginning to have an impact on restorative techniques and

technology. Streptococcus mutans has more to fear than a rheostat, now that we're armed with salivary diagnostics and bioactive materials.

At the end of this course, participants should be able to:

- Understand how to intervene medically in the caries process.
- Control patient caries risk with focused therapeutics.
- Design restorations to minimize recurrent decay.
- Improve the prognosis of restorative treatment.

Dr. Nový is the President of the DentaQuest Oral Health Center, Director of Practice Improvement at the DentaQuest Institute, and an adjunct associate professor of general dentistry. He served on the ADA Council of Scientific Affairs 2010-2014, and as chairman of the CAMBRA coalition through 2015. The California Dental Association Foundation presented him with the Dugoni Award for "Outstanding contributions to dental education," and in 2009, the American Dental Association awarded Dr. Nový and his office the title, "Adult Preventive Care Practice of the Year." In 2016 he was appointed the consumer advocate on the United States Food and Drug Administration Dental Products Panel.

This program is sponsored by GC America.

All programs are suitable for doctors, staff, and hygienists.
